

RIFQI JALU PRAMUDITA

+62 821 2323 7274 | rifqijalu@gmail.com | linkedin.com/in/rifqijalu/
South Jakarta, Indonesia

Data-driven operations and supply chain professional with experience in field operations, dashboard reporting, process improvement, and cross-functional coordination. Holds a Master's degree in Industrial Engineering with a strong foundation in logistics, supply chain, and research-based problem solving. Experienced in turning operational data into structured insights that improve execution.

Work Experiences

Fabrica Indonesia - Jakarta, Indonesia

Jun 2024 - Present

Area Operations Assistant Manager

- Promoted from Area Operations Supervisor, retaining primary ownership of field service operations while expanding scope into production, inventory, and logistics.
- Lead field service coordination across Jakarta, Tangerang, South Tangerang, Depok, Kabupaten Tangerang, and Bekasi through 2 field service staff and 13 technicians, managing approximately 32 schedules per day.
- Plan and monitor daily field service capacity of up to 17 measurement visits and 15 installation visits.
- Support production coordination for 2 fast-moving and operationally sensitive product lines within Fabrica's 16-product portfolio, including production planning, daily output monitoring, capacity coordination, and quality control.
- Oversee inventory readiness and outbound material flow for selected products and service spare parts, while helping streamline workflows and resolve urgent operational issues across teams.

Area Operations Supervisor

- Led end-to-end fulfillment of survey, installation, and service visits across Greater Jakarta, covering scheduling, technician assignment, and on-site execution tracking.
- Partnered with Sales, Production, and Logistics to streamline delivery-to-install workflows and resolve field issues quickly.
- Built and deployed a live no-code Field Operations app (AppSheet) on a centralized database with unified reporting, covering visit operations, workforce directory, attendance tracking, reimbursements, pending requests, and reschedule/exception handling; fully adopted in Jakarta and partially rolled out to Surabaya.
- Managed a team of 8 (1 team lead and 7 technicians) within a business unit contributing roughly 42%-50% of global revenue.

Logistic and Supply Chain Management Lab. - DTSI ITS - Surabaya, Indonesia

Dec 2019 - Dec 2020

Research Assistant

- Conducted end-to-end research covering problem definition, literature review, experimental design, data analysis, and interpretation for supplier-retailer pricing strategy research.
- Secured research funding from the Institute of Research and Community Service ITS (Rp. 50,000,000).
- Developed an agent-based model and contributed to conference presentation and publication.

PT. Angkasa Pura Cargo - Tangerang, Indonesia

Oct 2017 - Jun 2018

Data Collection Team Coordinator

- Supervised and evaluated a 44-person data collection team supporting warehouse operations.
- Analyzed daily tonnage trends across 17 warehouses to support dispatch decisions and operational monitoring.
- Built an Excel-based reporting system that reduced report lag time from 5 days to 2 days and improved input speed.
- Managed shift scheduling and administrative coordination for frontline personnel.

Additional Experience

Sekolah Tinggi Teknologi Texmaco - Subang, Indonesia

Mar 2021 - Present

Part-time Lecturer, Assistant Professor

- Teach supply chain, PPIC, production systems, cost analysis, and statistics.
- Contributed to graduate learning outcomes and competency-based curriculum design.

LuarSekolah - Jakarta, Indonesia

Jul 2023 - Jul 2024

Assistant Trainer

- Facilitated stock-taking classes for 30+ participants and supported Q&A, discussion, and evaluation.

PT. Indal Steel Pipe - Gresik, Indonesia

Sep 2020 - Dec 2020

Intern

- Supported logistics planning, material usage planning, process flow drafting, and stacking standards for EPC-related pipe projects.

Education

Institut Teknologi Sepuluh Nopember - Surabaya, Indonesia

Sep 2018 - Aug 2020

Master of Industrial Engineering, GPA 3.52/4.00

- Specialization: Logistics and Supply Chain Management.
- Thesis: "Retail Pricing Strategy Considering Inventory Capacity Constraint: An Agent-Based Modeling Approach."

Universitas Pendidikan Indonesia - Bandung, Indonesia

Sep 2013 - Jun 2017

Bachelor of Management, GPA 3.50/4.00

- Specialization: Operations Management.
- Final study: Material Requirement Planning (MRP) implementation on company operations.

Skills and Certifications

- Core Skills: Operations Management, Supply Chain & Logistics, Dashboard Reporting, Data Analysis, Process Improvement, Cross-functional Coordination, Research & Structured Problem Solving
- Tools: Spreadsheet, Looker Studio, Python for Data Analysis, SPSS, MySQL (limited analytical use), QGIS, ArcGIS
- Certifications: Certified Supply Chain Analyst (ISCEA Indonesia, 2021); Competency Assessor (BNSP Indonesia, 2021); Warehouse Management (BNSP, 2022)
